Re: Get On Board gear grant

To whom it may concern,

We are so stoked to award your schools the Get On Board gear grant. Jasmine Lance will be a fantastic ambassador for the program and your students will love skateboarding as a PE activity.

The gear grant includes up to 20 complete skateboards, helmets, and sets of elbow & knee pads. In addition to gear, the grant also includes training, ongoing support, and resource access. The training is divided into two courses; the first is dedicated to all safety aspects, from environmental (the space where skateboarding occurs) to classroom management tips and equipment usage/maintenance.

Please note, while I chose the most condensed options offered on the form, the true intent of the grant is for the equipment and knowledge to be shared across as many schools/communities as possible for maximum impact on students. We have committed to supporting grant recipients with more gear each year if they continue to grow the footprint of the program.

Ideally, the equipment will be used by multiple schools in a district and possibly across town and state lines when possible. We have multiple recipients on state lines who are taking advantage of an opportunity to gain extra equipment by recruiting neighboring schools to participate.

We fully support the gear being used in multiple schools and districts and after school if and when possible.

Please reach out with any questions or concerns.

Best,
Beau Lambert
